

## MANEESH JUNEJA

### Planetary Health Futurist

Maneesh Juneja is a Planetary Health Futurist. He isn't just a speaker; he's an experience. A global phenomenon,, whose keynotes have ignited minds and inspired action in cities across the planet, from bustling metropolises to tech hubs and cultural capitals. His insights on 3D printing of human organs, featured on Netflix ("The Future Of"), don't just anticipate the future – they shape it, revealing a reality where humanity transcends its limitations and co-creates a thriving planet.

But Maneesh's vision isn't built on speculation. It's forged from a remarkable career spanning three decades, where he has used data to drive decision making. From the rigorous analysis of the Whitehall study at University College London to managing the Tesco database at DunnHumby, and even delving into the world's largest health insurance claims databases at GSK R&D, Maneesh has consistently pushed the boundaries of what's possible.

And that's not all. After leaving GSK, he spent 12 years as a Digital Health Futurist, influencing leaders across the healthcare sector and shaping the very landscape of modern medicine and life sciences. He brings this unique, multi-faceted experience to every stage, offering a perspective that's both deeply informed and breathtakingly imaginative.

Maneesh's presentations are legendary. He's a master storyteller, weaving together his own unique experiences with cutting-edge science, philosophy, and ancient wisdom to create an unforgettable experience. He'll take your audience on a journey beyond the limits of their imagination, leaving them inspired, energized, and ready to embrace the future. Maneesh challenges conventional thinking, pushing boundaries and inspiring audiences to envision a radically different future. He paints a vivid picture of a world transformed, where human potential is unleashed and the planet thrives.
